The Role of Family Planning Clinics in Substance Use and Examples from the Field

Overview
In the third webinar of a 3-part series, there will be a brief review of recent focus group study of implementation barriers and opportunities of SBIRT in family planning. Then a panel of personnel who work in family planning clinics will share their perspectives from the field, addressing implementation, barriers, and opportunities to address substance use.

Successful Completion
This course offers 1.5 contact hours. To receive contact hours, participants must complete the course with a satisfactory grade of 80% or higher on the quiz and complete the Evaluation/Request for Credit form. CNE and certificates of completion will be available immediately upon passing the course and submitting the evaluation. CHES CECH certificates will be available 4-6 weeks after passing the course and submitting the evaluation.

Objectives
• Describe a recent focus group study of implementation barriers and opportunities of Screening, Brief Intervention, and Referral to Treatment (SBIRT) in family planning,
• Discuss examples of family planning clinics implementing substance use screening &/or treatment
• Identify barriers to substance use in family planning clinics
• Identify opportunities to address substance use in family planning clinics
