Integrated Treatment Webinar Series

Integrated treatment is the buzzword of the day, but what does it really look like? What is possible given funding restrictions and siloed services? Join this five-part webinar series to explore these questions and learn more from national experts.

June 10, 2020

Defining and Assessing Integrated Behavioral Health Capacity

Research indicates that integrated treatment is more effective than sequential treatment and parallel treatment for people with co-occurring mental health and substance use disorders. This presentation will introduce the Dual Diagnosis Capability in Addiction Treatment (DDCAT) and the Dual Diagnosis Capability in Mental Health Treatment (DDCMHT) instruments and toolkits for improving co-occurring disorder (COD) treatment capability.

Presenter(s): Mark McGovern, PhD & Heather Gotham, Ph.D

Integrated Treatment Webinar Series, Continued

August 19, 2020

Best Practices for Co-occurring Disorders Treatment: Staffing and Training

Organizational staffing directly impacts program capacity for integrated treatment, particularly whether an organization's staff composition includes staff with dual licensure or extensive experience treating individuals with co-occurring disorders. This webinar will address strategies for staffing, supervision, and training that can contribute to an improved infrastructure and ongoing staff development that will enhance integrated care.

September 23, 2020

Best Practices for Co-occurring Disorders Treatment: Intake, Screening, and Assessment

Routine screening and assessment for mental health and substance use is essential for identifying the full range of behavioral health issues affecting each client. This webinar will explore best practices for screening, including recommended and validated screening tools as well as policies and procedures that will support routine, systematic, and comprehensive clinical assessment.

October 21, 2020

Best Practices for Co-occurring Disorders Treatment: Integrated Treatment Planning, Service Provision and Continuity of Care

This webinar will discuss strategies for developing integrated treatment plans, assessing and monitoring the interactive course of both disorders, and implementing specialized interventions for both disorders including psychoeducation, pharmacology, family education and support, and peer support. The webinar will also address strategies for ensuring there is ongoing focus on recovery for both disorders during the discharge process helping to ensure the capacity to maintain treatment continuity for complex COD.
